# Meridian Biosciences

Biological age testing (invented company)

# Advanced BioAge Report

| | |
|---|---|
| Patient | **Sample Patient A** |
| Age / Sex | **38 / Male** |
| Patient ID | **MB-20931** |
| Collected | **08 Sep 2025** |
| Reported | **12 Sep 2025** |

Invented sample report for demonstration only. Not a real laboratory or patient.

# Aging Summary

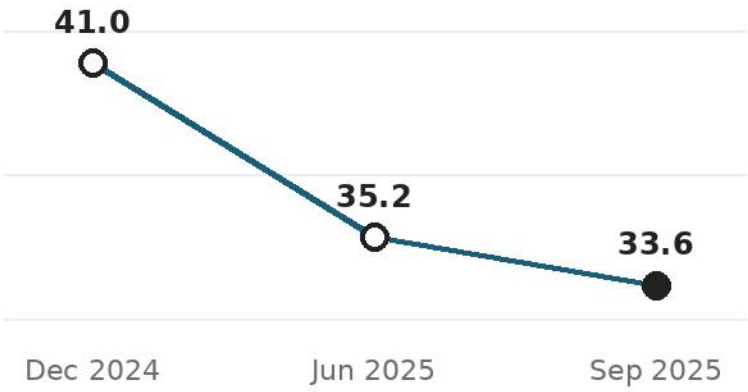

Chronological age: 38.2

## Cellular Age Index

33.6

years

Younger

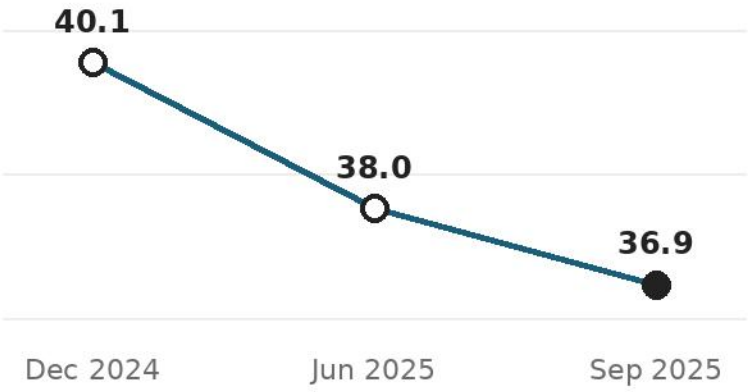

## Organ Systems Age

36.9

years

Younger

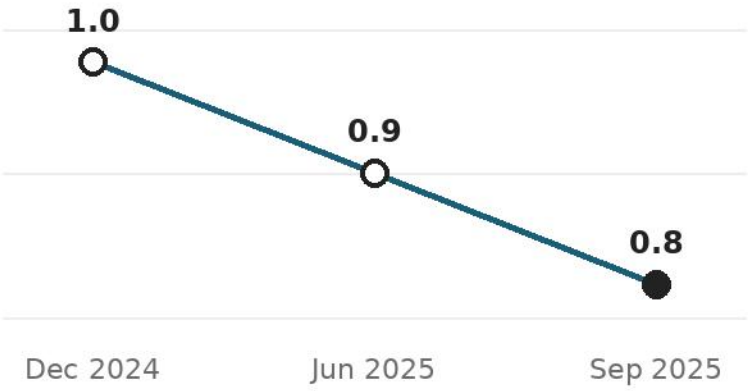

## Aging Tempo

0.8

years per year

Slower

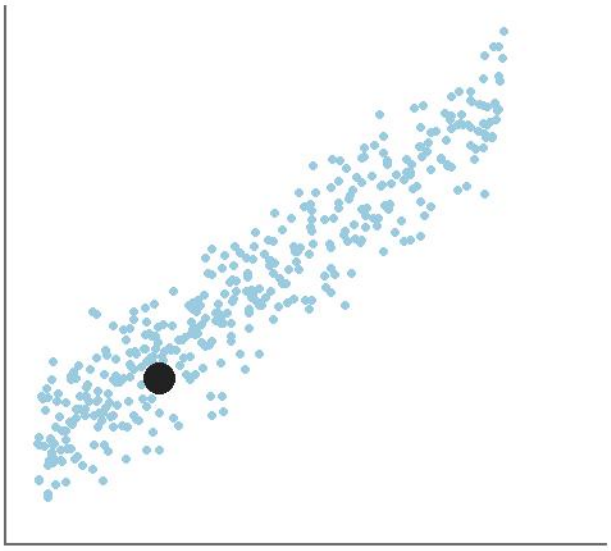

# Cellular Age Index

Chronological age: 38.2

Cellular Age Index

33.6 Younger

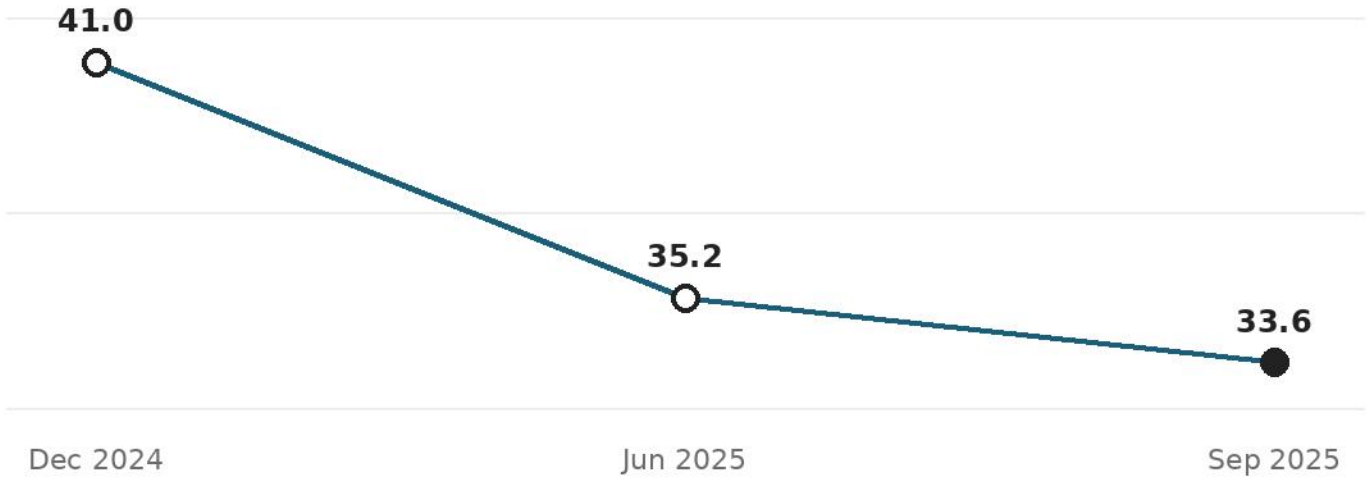

Chronological age

17.6%

Your Cellular Age Index is lower than 82.4% of people of the same age and sex.

## Results Over Time

The population graph and percentile are based on invented data patterns and are shown for demonstration only.

# Aging Tempo

Your rate of aging will change based on your lifestyle. Be sure to retest every 3 months to track your progress.

0.8

0.45 — 1.6

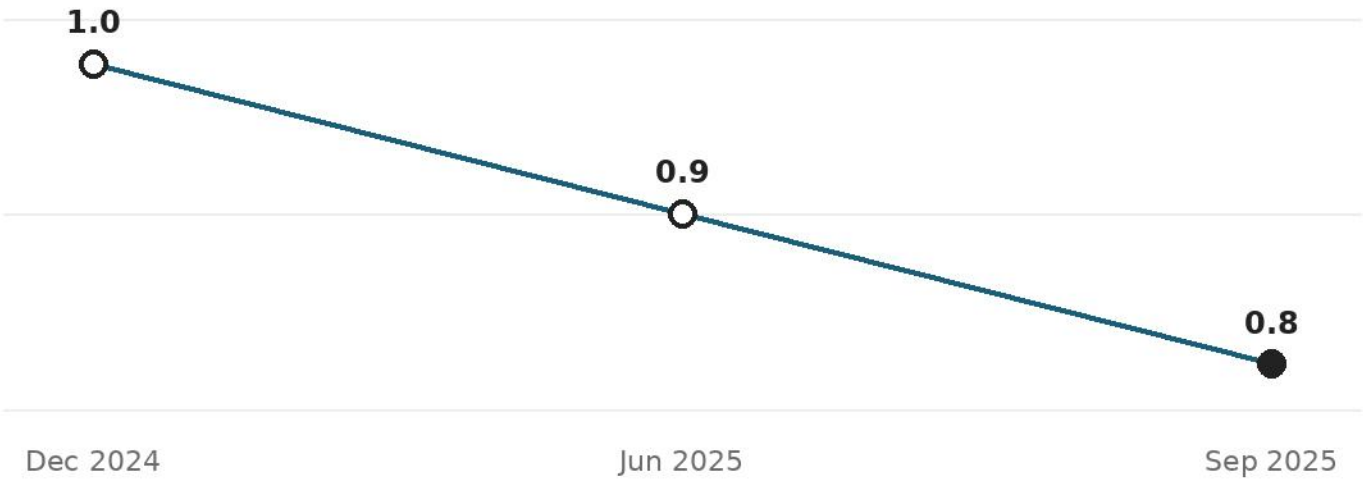

**Your score < 1**

Each year that passes, your body will biologically age 0.8 years.

**Reference range: < 1**

A score below 1 means your body is aging more slowly than one year for each calendar year.

## Results Over Time

# Most Actionable Biomarkers

Biomarkers are compared with a reference group of people of the same sex and a similar age. They are listed in order of impact on your Cellular Age Index.

## Marker Alpha-7 — High

84.2%

**Function**

Alpha-7 is a protein linked to cell stress and protein turnover.

**Recommendations**

- Stay well hydrated.
- Eat more leafy greens and berries.
- Make time for regular rest.

## Protein Q12 — High

81.5%

**Function**

Q12 is a structural protein involved in tissue repair and blood vessel health.

**Recommendations**

- Consider an anti-inflammatory diet.
- Stay physically active.
- Keep an eye on your blood pressure.

## Lipid L-18:2 — Low

12.7%

**Function**

L-18:2 is a fat molecule that supports cell membranes and brain health.

**Recommendations**

- Eat more oily fish, flaxseeds and walnuts.
- Limit alcohol.

# Additional Biomarkers

## Marker Beta-3

Normal

52.0%

**Function**

Beta-3 is a protein that helps carry substances around the body.

**Recommendations**

- Keep a balanced diet.

## Protein R5

Normal

34.6%

**Function**

R5 is an enzyme involved in digestion and cell processes.

**Recommendations**

- Maintain an active lifestyle.

## Enzyme S9

Normal

71.3%

**Function**

S9 is an enzyme that helps the body clear waste products.

**Recommendations**

- Stay hydrated.
- Eat a balanced diet.

## Marker T2

Normal

45.8%

**Function**

T2 is a small molecule linked to energy metabolism.

**Recommendations**

- Exercise regularly.
